MAXMEYER[®] AQUAMAX[®] EXTRA

EASY APPLICATION. HIGH PERFORMANCE.

EXTREME COLOR.

Matching popular OEM colors in the body shop just got easier, thanks to *MaxMeyer* Extreme Color toner and Midcoat Base Incolore - the newest addition to our trusted *AquaMax* Extra water-based paint system.

By enabling a fully waterborne tri-coat paint application, it boosts efficiency and helps painters achieve accurate color matches, smooth coverage, and outstanding performance.

Traditionally, achieving the bright, clean colors of modern vehicles involved using solvent-based tinted clearcoats. However, these clearcoats required lengthy drying times between coats, and carried the risk of imperfections.

Easy application, excellent results

MaxMeyer Extreme Color toner and Midcoat Base Incolore joins the *AquaMax* Extra paint system to deliver a fully waterborne solution that helps painters to achieve the best results quickly and easily. Extreme Color can be used to replace the tinted solventborne mid-layer clearcoat in a tri-coat paint application. This saves time on the paint preparation and application stages and makes it easier for all body shop painters to attain smooth coverage, even color, and outstanding results.

Available products:

- > 1.590.0096 Extreme Color Arancione Organico, 0.5L
- > 1.590.0080 Midcoat Base Incolore, 2L

EXTREME COLOR TONERS OFFER:

Simplified processes: reduce the steps in your mixing processes

Easier application: even coverage from a waterborne product

Accurate color matching: easily replicate modern OEM colors

Reduced material consumption: no need to prepare an additional clearcoat

Greater color performance: mid-coat layer can be shaded for a precise color match

Less clearcoat film needed: no need for multiple coats of clear to achieve the correct color

Greater efficiency: quicker application and flash-off times

VOC compliance: meets current VOC legislation

We make your job easier.
